

Lachlan Peterson

Junior Full-Stack Web Developer

Highly motivated individual with strong communication and interpersonal skills. Looking to transition from sales into a technical full stack web developer. I completed a course at Coder Academy to develop a strong IT foundation. Proven to be efficient in sales, meeting set KPI standards, target budgets for companies all while maintaining high customer and candidate satisfaction.

Portfolio

[Website Portfolio](#)

Education

2023

Diploma of IT - Web Development
Coder Academy

Studied 2014-2018

Bachelor of Psychological Science
University of Queensland

2008-2013

**Senior Certificate OP 5
& Certificate II in IT**
St Peters Lutheran College

Tech Skills

Languages:

- HTML, CSS, Python, JavaScript, SQL

Databases:

- PostgreSQL, MongoDB, MySQL

Frameworks:

- Flask, Node.js

Tools:

- Express.js, React

OS:

- Windows, Linux

Other Skills:

- GitHub Version Control
- Office Suite (Word, Excel etc.)

Projects

'Tumbling Skills Tracker' - A Full-Stack MERN Application

- The purpose of this project was to design, implement, create and test a MERN (MongoDB, Express.js, React & Node.js) application for a real world client.
- The application gave admins and coaches at 'Elite All-Stars' a way to track student athletes individual tumbling skills progression, and conduct new assessments.

The front-end and back-end of the website was built using JavaScript in VS Code, and deployed on Netlify. (Non-admin login: elitecoach - foobar)

'The Golden Worm' - A text input/output terminal game

- The purpose of this project was to design, implement, create and test a terminal application.
- The application was required to accept user input (through file or text input) and produce a printed output, allowing users to interact with the application.
- The Golden Worm is an interactive text input/output game that remasters the classic game 'snake'.
- Users interact with the application through text input, navigating through menus/prompts and specifically when controlling the worm in the game page.
- The application prints different menus/prompts based on user input and importantly, it reprints the terminal while playing the game on a timed input.
- Re-printing the game on a timed input gives the impression of movement, and allows users to play 'The Golden Worm' in the Terminal without any GUI displays.

The app was built using Python in VS Code, with various imports outlined in the GitHub repository linked in the title above. While building and developing the application, I furthered my skillset in Python through loops, conditional statements, functions, nested functions, proper variable scope and the correct use of imports.

'Web Portfolio' - My personal website portfolio

- The aim of this project was to design, develop and deploy a portfolio website that showcases my abilities and coding experience.
- This website provides users with information about me, my interests, professional knowledge and skillset

The website was built using HTML and CSS in VS Code, and deployed on Vercel. While building my portfolio, I wrote semantic HTML code and implement responsive web design in my CSS style sheets. The website portfolio is linked in the sidebar under the Contact section and the GitHub repository is linked in the title above.

Key Skills

- Excellent communication and interpersonal skills, allowing for well-developed interactions with all types of people.
- Enthusiastic and cooperative member of any team, showing commitment to all activities undertaken.
- Forward thinker focused on servicing both internal and external customers.
- Someone who works well with all levels of staff and treats everyone with respect.
- Punctual and reliable, willing to take instructions and prioritizes numerous tasks in an efficient manner.
- Attention to detail, allowing me to identify and analyse problems.

Interests

- Studying Psychology and coming from recruitment, I am interested in the relationship between sales and interpersonal communication skills.
- The influence of Human Factors on Software Development
- Playing Football (Futsal & 7-a-side currently)
- Men's Fashion
- Video Games
- Watching Formula 1

- References will be available upon request.

Employment History

2021-2022

Humanised Group

Talent Acquisition - Cyber Security

- Responsible for the sourcing and talent pooling of IT professionals in the Cyber Security space.
- First point of contact for candidates and the initial representative for the company in security, so provided an excellent experience for candidates.
- Gave career advice, found ideal positions and companies for candidates, scheduled interviews, prepped candidates, and managed the process on the candidate side (check-ins, follow ups etc).

The main areas I had been sourcing and recruiting for included: Security Analysts, Information/Cyber Security & Risk, Engineers, Architects & Managers, Incident Response & Threat Intelligence, Penetration Testers & Red Teamers, Security Network Engineers, Security Consultants, IT Governance, Risk and Compliance, and Digital Forensics and Incident Response.

2016 - 2021

Connor Clothing Pty Ltd

Senior Sales Assistant / 2IC

- Responsible for greeting and assisting customers, processing cash and card payments, and meeting daily & weekly sales budgets while maintaining high KPI's.
- Involved in stock control and management, re-stocking shelves with merchandise and reporting discrepancies to the store manager.
- In charge of the visual merchandising in the store, and tasked with changing signage and store layout for special promotion offers.
- Kept the store tidy and clean (vacuuming, wiping mirrors, mopping), whilst also moving product to ensure the store was visually appealing to customers.

Overall, I was responsible for the operation of store days, which included: opening and closing the store, counting and balancing the float/till, leading and delegating tasks to other casuals, prioritizing tasks based on urgency and importance, and selling products to customers.
